

WHAT YOU'LL NEED

You may already have some of these items

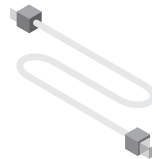

Belong Wi-Fi modem

Modem power cord

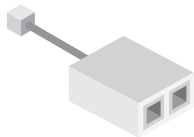

Phone cable

Wi-Fi card

ADSL filter

Use this filter only if you're setting up an ADSL connection and you want to keep a home phone connected.

Phone socket

This is the existing phone socket in your house, it must be connected and working.

SETUP GUIDE

BELONG

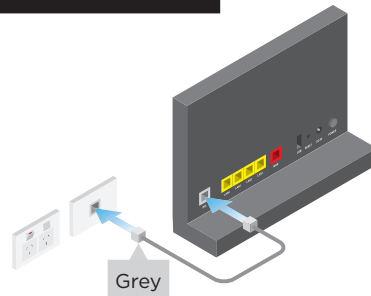

Before you start...

nbn services only:

- I've unplugged anything connected to the phone sockets in my house.
- I've checked with manufacturers whether equipment I rely on will work on the nbn network (Like medical, fire & security alarms).

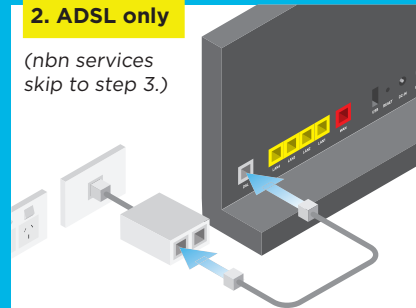

1. Connect modem

Plug the grey phone cable into a working phone socket and into the DSL port on the back of the modem.

2. ADSL only

(nbn services skip to step 3.)

For ADSL connections where you want to keep a home phone connected, plug your phone cable into the 'ADSL' port on your filter and then plug the filter into a working phone socket.

3. Power up modem

Plug your modem into the powerpoint using the power cord.

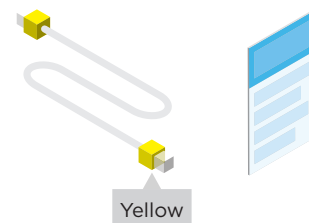

Switch on the powerpoint AND press the black power button on the back of the modem.

4. Internet connection

The Power light will turn solid green and then the Wi-Fi and Internet lights will turn solid green. This can take up to 20 minutes. Once this happens, your internet is ready to use.

5. Connect devices

Use the spare yellow ended Ethernet cable to plug devices (e.g. Laptop) directly into your modem or connect via Wi-Fi using the credentials on your Wi-Fi card.
